### **DETAILED ACTION**

1. This action is in response to the request for reconsideration filed March 16, 2010.
2. Claims 1-9 and 12-14 are currently pending. Claims 1-9 and 12-14 have been previously presented.
3. Applicant's arguments, with regards to claims 7-9 and 12-14, filed March 16, 2010 have been fully considered but are not persuasive.

### ***Allowable Subject Matter***

4. Claims 1-6 are allowable.
5. The following is an examiner's statement of reasons for allowability:
6. Hardjono teaches sending a communication fragment with an MIC using a target group address. Chen teaches a router performing address-replacement for the direction of communications direction and the recipient performing address replacement for purposes of verification.
7. Claim 1 recites where the router is not part of the trusted group to which the sender and receiver belong. This limitation in combination with the other recited limitations of claim 1 is not taught or suggested by the prior art of record.

### ***Examiner Notes***

8. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections – 35 USC § 112***

9. Claims 7-9 and 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant has specifically associated the elements of the claims corresponding structures in Figure 2 of the disclosure, but no structure or algorithm for these elements is actually provided in the specification.

### ***Response to Arguments***

10. Applicant's arguments, with regards to claims 1-9 and 12-14, filed July 17, 2009 have been fully considered but are not persuasive.

11. Applicant argues that the “original claims clearly linked or associated the claim elements by number with the corresponding structures in the specification.”

12. The Examiner respectfully disagrees, as the figures are part of the disclosure, not the specification. The only explanation (or even passing mention) of the listed elements within the specification is that provided by the original claims, which results in a circular and ultimately ambiguous definition.

13. Therefore, in view of the above reasons, Examiner maintains rejections.
